LIST OF CONTENTS

Number 1

Masao Kuwahara and **Takashi Akamatsu**	1	Decomposition of the reactive dynamic assignments with queues for a many-to-many origin–destination pattern
Chandra R. Bhat	11	Covariance heterogeneity in nested logit models: econometric structure and application to intercity travel
Philip A. Viton	23	Technical efficiency in multi-mode bus transit: a production frontier analysis
Chandra R. Bhat	41	Work travel mode choice and number of non-work commute stops
Hai Yang	55	Sensitivity analysis for the elastic-demand network equilibrium problem with applications
Joyce Dargay and **Dermot Gately**	71	The demand for transportation fuels: imperfect price-reversibility?
	I	Forthcoming Papers

Number 2

Carlos F. Daganzo	83	A continuum theory of traffic dynamics for freeways with special lanes
Carlos F. Daganzo, Wei-Hua Lin and **Jose M. Del Castillo**	103	A simple physical principle for the simulation of freeways with special lanes and priority vehicles
Marja-Liisa Siikonen	127	Customer service in an elevator system during up-peak
Hanif D. Sherali, Namita Arora and **Antoine G. Hobeika**	141	Parameter optimization methods for estimating dynamic origin–destination trip-tables
Jovan Popović and **Dušan Teodorović**	159	An adaptive method for generating demand inputs to airline seat inventory control models
	I	Forthcoming Papers

Number 3

Thomas F. Golob and **Michael G. McNally**	177	A model of activity participation and travel interactions between household heads
Tetsuo Yai, Seiji Iwakura and **Shigeru Morichi**	195	Multinomial probit with structured covariance for route choice behavior
Alan Nicholson and **Zhen-Ping Du**	209	Degradable transportation systems: an integrated equilibrium model
Zhen-Ping Du and **Alan Nicholson**	225	Degradable transportation systems: sensitivity and reliability analysis
Dirk Heidemann and **Helmut Wegmann**	239	Queueing at unsignalized intersections
Eric I. Pas and **Shari L. Principio**	265	Braess' paradox: some new insights
	I	Forthcoming Papers

Number 4

Bin Ran, Nagui M. Rouphail, Andrzej Tarko and **David E. Boyce**	277	Toward a class of link travel time functions for dynamic assignment models on signalized networks
Paolo Ferrari	291	Capacity constraints in urban transport networks
Hai Yang and **Michael G. H. Bell**	303	Traffic restraint, road pricing and network equilibrium
Fabien M. Leurent	315	Curbing the computational difficulty of the logit equilibrium assignment model
Luca Bertazzi, Maria Grazia Speranza and **Walter Ukovich**	327	Minimization of logistic costs with given frequencies
M. J. Maher and **P. C. Hughes**	341	A probit-based stochastic user equilibrium assignment model
	I	Forthcoming Papers
	VI	Call for Papers

Number 5

Robert B. Dial 357 Bicriterion traffic assignment: efficient algorithms plus examples

Jifeng Wu 381 A real-time origin–destination matrix updating algorithm for on-line applications

S. C. Wong and **Hai Yang** 397 Reserve capacity of a signal-controlled road network

Richard John Sweet 403 An aggregate measure of travel utility

Yee Leung and **Jianping Yan** 417 A note on the fluctuation of flows under the entropy principle

I Forthcoming Papers

Number 6

Hai Yang and **Hai-Jun Huang** 425 Analysis of the time-varying pricing of a bottleneck with elastic demand using optimal control theory

Xiaoyan Zhang and **David F. Jarrett** 441 Stability analysis of the classical car-following model

Marco A. F. Caldas and **Ian G. Black** 463 Formulating a methodology for modelling revealed preference discrete choice data—the selectivity replicated logit estimation

Edward N. Holland and **Andrew W. Woods** 473 A continuum model for the dispersion of traffic on two-lane roads

I Forthcoming Papers
